Technical sheet:

# MBL 745 HT RANGER (BSV)

Manitou is committed to bringing value to its backhoe loaders by incorporating advanced and robust features for multi-application capabilities. Powered by a BS-V turbocharged engine, the Ranger variant is launched for robustness and improved working on harder surfaces. A curved boom ensures there is no dip in the efficiency of the machine while used on harder strata and can smoothly operate in tough conditions. Curved boom due to its narrow width enables easy operation in narrow and confined areas and improves rear visibility.
